EXPERIENCE

Zendesk, Melbourne — *Senior Software Engineer in Test*

November 2016 - PRESENT

I conduct the activities and procedures relating to quality, for several software development teams. I assist in the coaching of their testing techniques and Agile practises.

Reece Group, Melbourne — *Test Analyst Team Lead*

October 2014 - November 2016

In addition to working as part of my own Agile team, I was also in charge of recruitment for talented Test Analysts to join the group. I also like to keep up to date with the tools and trends of modern day testing and assess the improvements we can continue to make.

Reece Group, Melbourne — *Test Analyst*

February 2009 - October 2014

I worked with a number of different teams, doing Agile project work. Roles included test analysis and development, Scrum Mastery, active SME

EDUCATION

Swinburne University, Lilydale — *Bachelor of Applied Science in Information Technology*

January 2001 - October 2004

Rapid Software Testing, Melbourne — *Degree*

September 2016

Rapid Software Testing (RST) is a complete testing methodology, designed for a world of barely sufficient resources, information, and time. It is a mind-set and a skill-set focused on performing testing more quickly and less expensively while completely fulfilling the mission of testing.
